

AIR QUALITY ISSUES IN THE FOUR CORNERS AREA

San Juan Public Lands

An aerial photograph of a rugged mountain range. The foreground shows steep, rocky slopes with patches of dark evergreen forest and lighter-colored scree or talus. In the background, a series of mountain peaks recede into the distance under a sky filled with large, white, puffy clouds. The overall scene is a vast, wild landscape.

Weminuche Wilderness

Potential Impacts to Visibility

**San Juan Generating
Station (1850 MW)**

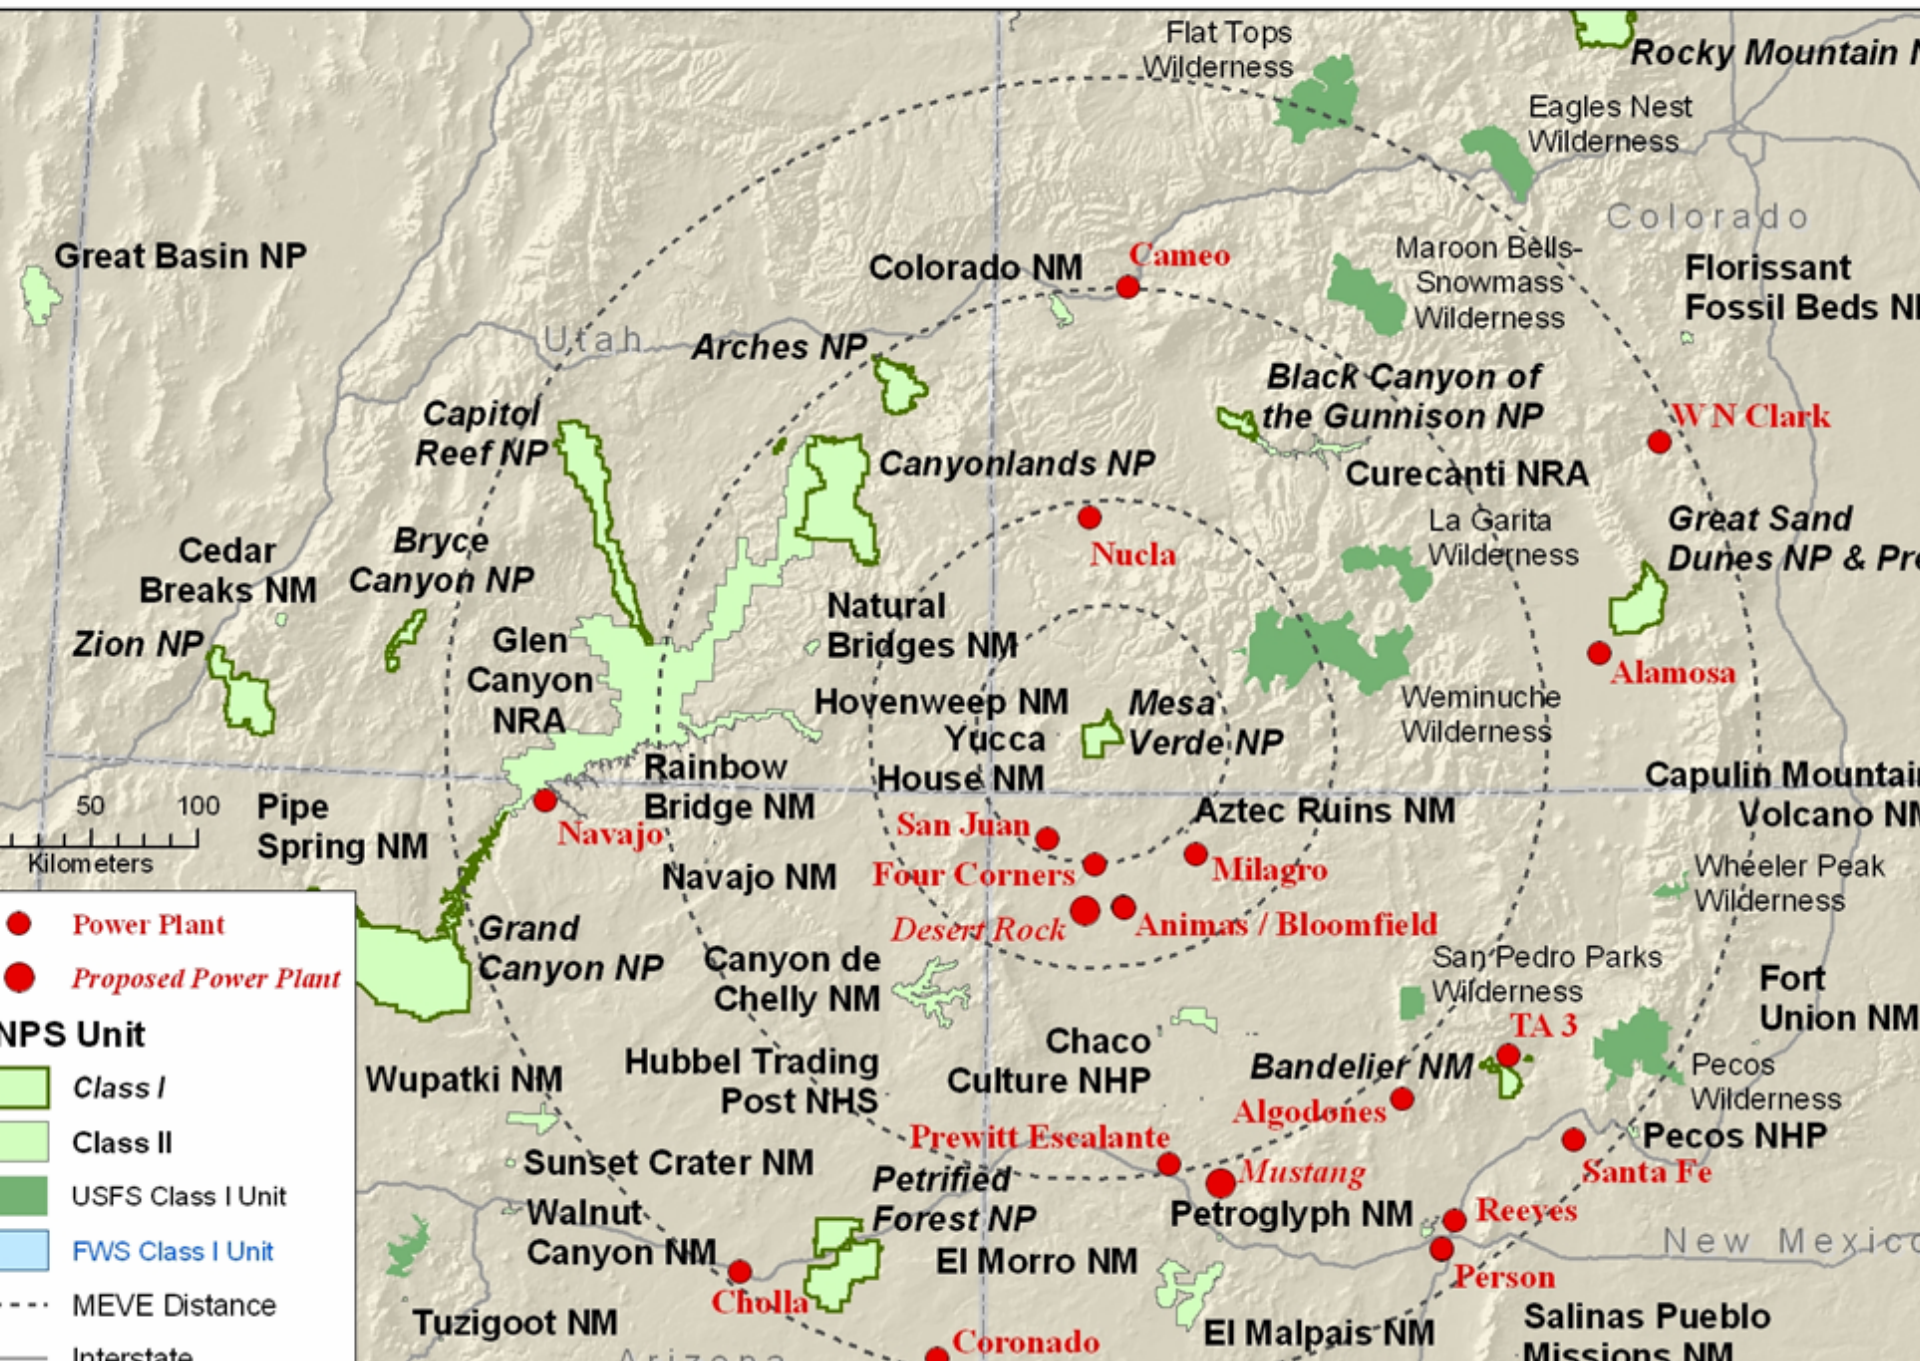

**Four Corners Power
Plant (2270 MW)**

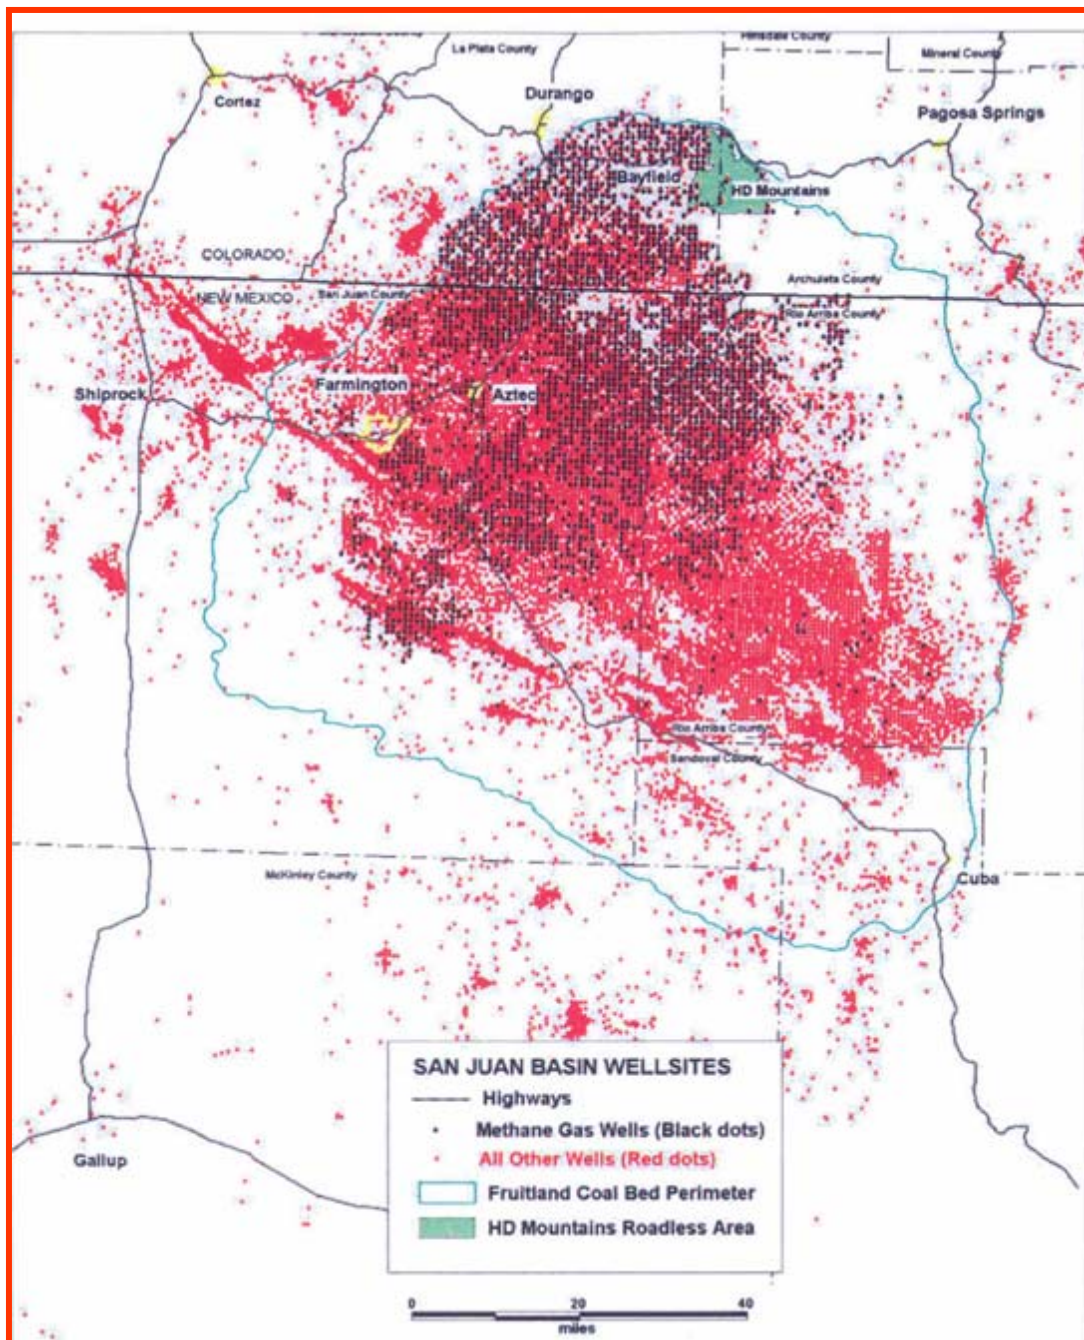

**Navajo Generating
Station (2250 MW)**

**New: Desert Rock
Power Plant (1500
MW)**

Power Plants Near Mesa Verde NP
