RE: Request for agenda items for the St. Marks, FL Steering Committee meeting October 16th & 17th

Scott, I won't be coming this year, and ***hereby give you my proxy to call out any and all BS.***

Update on IMPROVE Data, RHR Metrics,

October 17, 2018

Scott Copeland, CIRA/USDA Forest Service

IMPROVE Steering Committee Chair

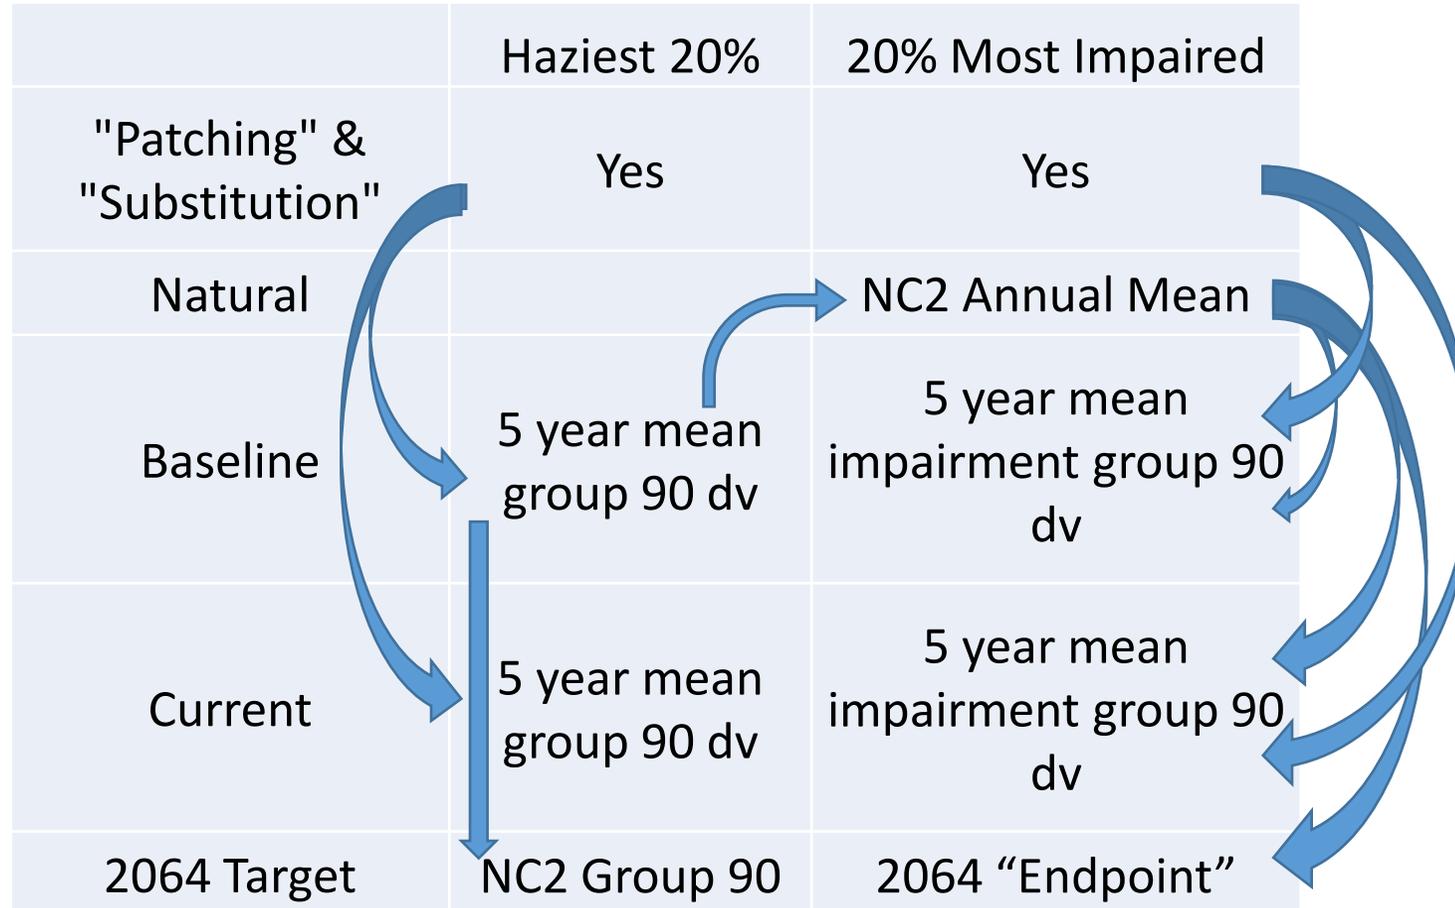

scott.copeland@colostate.edu

- 2017 Data delivered last Friday.
- RHR2 metrics, Impairment metrics available in FED soon.
- Proposing to consider RTI PC flagged (“possible contamination”) values as valid for RHR metrics.
- Draft version including extra patching days.
- Impairment technique 1 pagers.

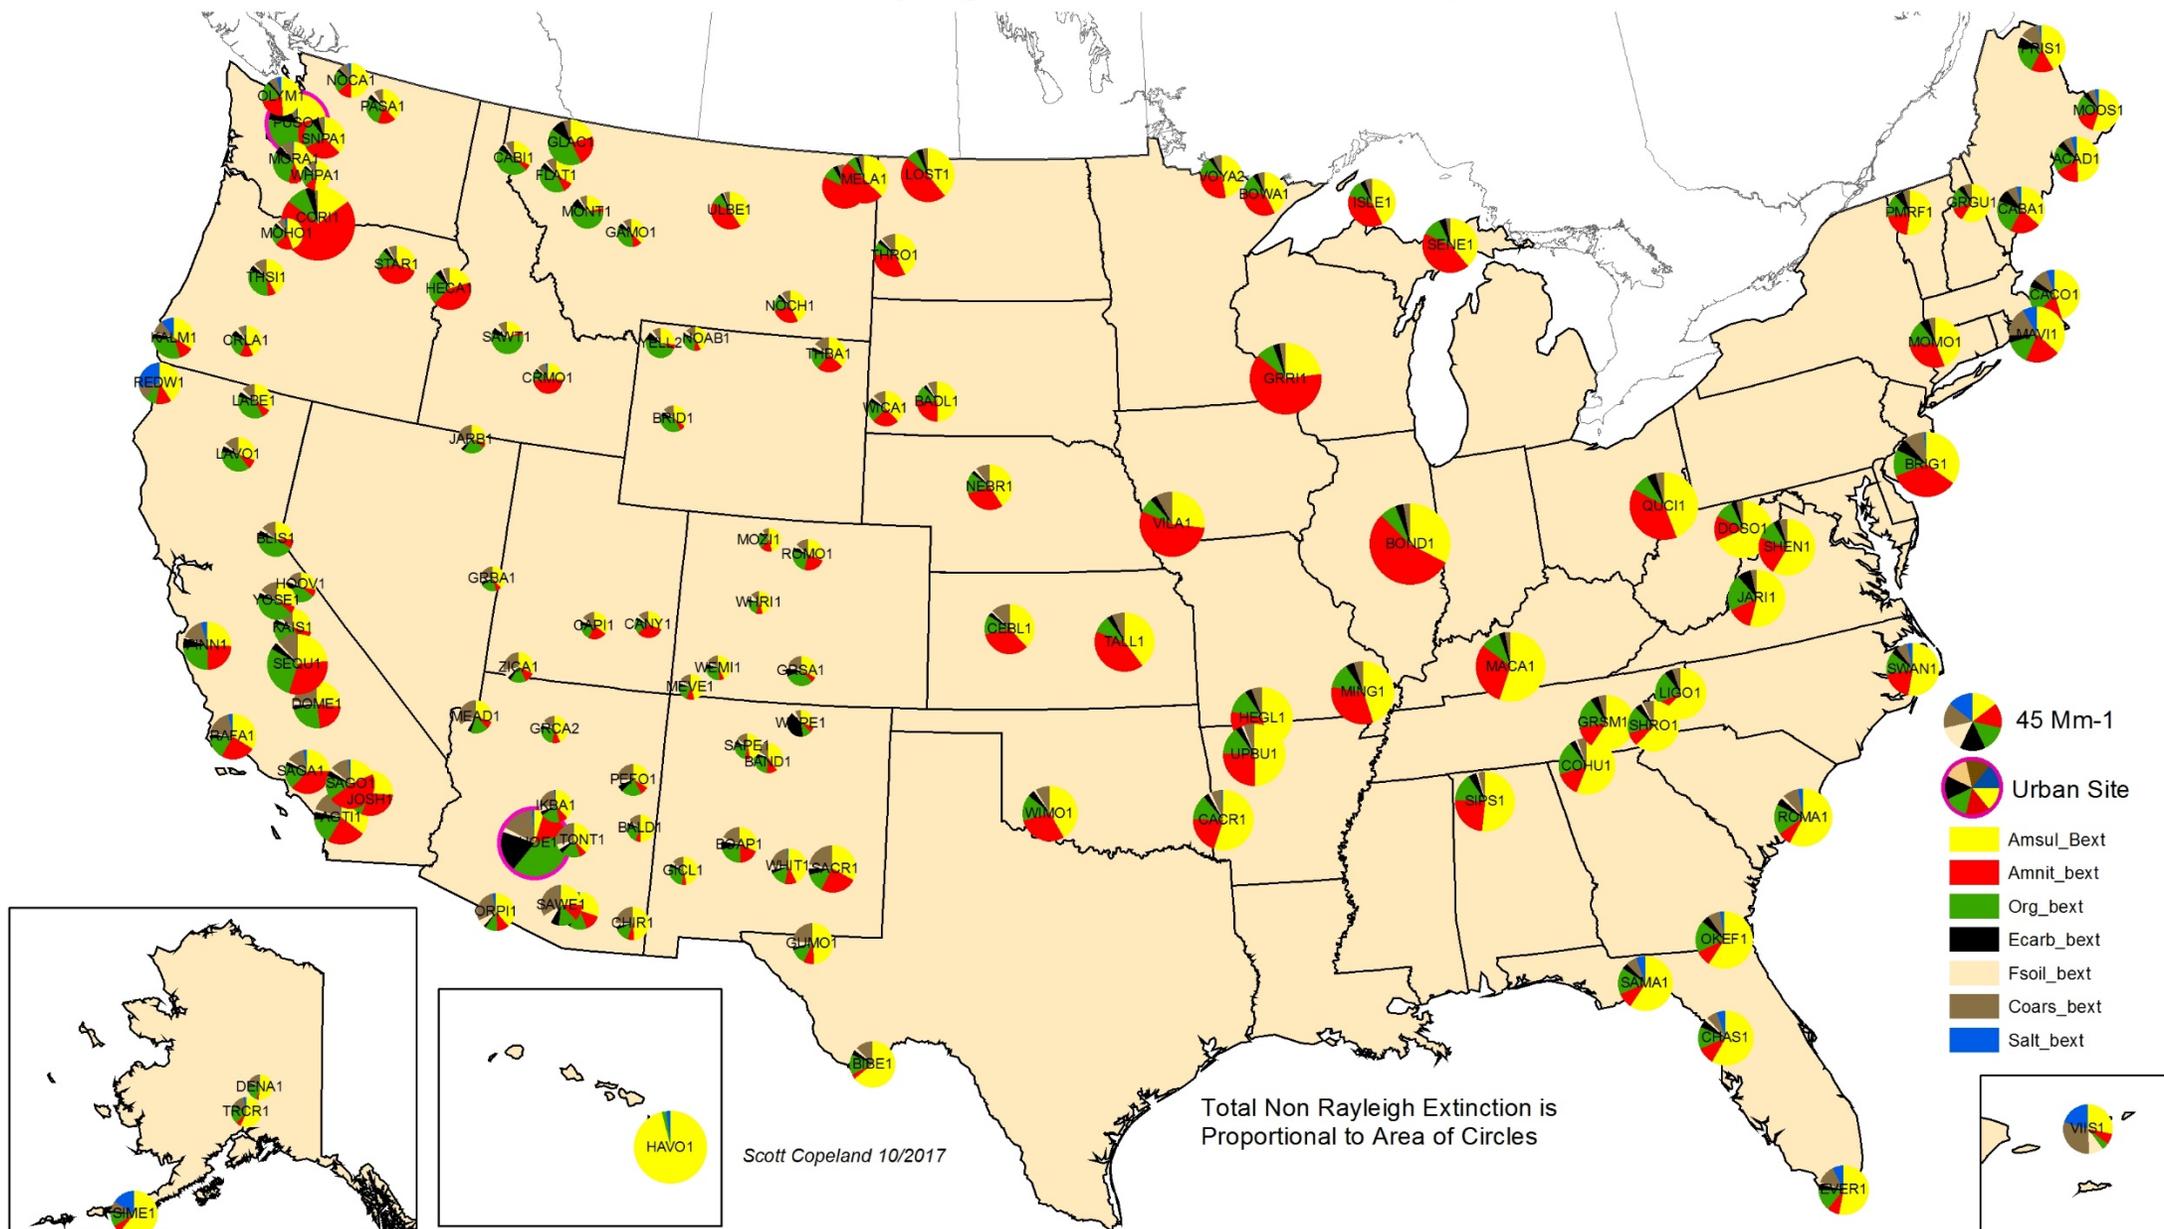

"Freezing" Data...

The RHR metric data sets are interconnected.

IMPROVE Data - 2016 Second IMPROVE Algorithm

DRAFT Non Rayleigh Mean of 20% Most Impaired

A few over 2400 sample days would be recovered by allowing this.
 59 by allowing 4 patches (all but 3 at HAVO1,2 at HACR1, 1 at SIME1)
 1293 by allowing 3 patches (usually soil, sea salt, coarse)
 1265 by allowing 2

We currently use 6373 with a single patch

Site years which would be valid with extra patched days.

site	year	total_per_year	complete_days_year	max_miss_days	good_year	complete_days_year	complete_year	max_miss_days	good_year	extra patched days
CACR1	2001	122	91	6	0	92	1	6	1	1
